

Configure the EWI User Assistance tile

You must configure the **EWI User Assistance** tile to enable the display of the *EWI User Assistance* documentation.

You can choose to display any one of the available localized versions of the *EWI User Assistance* documentation.

This configuration must be performed even to display the English version of the *EWI User Assistance* documentation.

1. Contact GTAC for the location of the **EWI_UserAssistance.pdf** file for the desired locale. Save a copy of the file to a local machine.
2. In Teamcenter, locate the **awc.war** file generated by TEM.
3. Open the **awc.war** file with a zip application (7-Zip, WinZip, etc.).
4. Within the **awc.war** file, locate the **EWI_UserAssistance.pdf** file in the following location, where *locale-directory* is the directory for your desired language.

awc.war\thinclient\docs\locale-directory

5. Replace the existing PDF file with the **EWI_UserAssistance.pdf** file for the desired locale that you received from GTAC.
6. Click **OK** and exit the archive.
7. Redeploy the **awc.war** file by following the instructions in the *Deployment Guide*.

NOTE: The **EWI User Assistance** tile must be configured any time the **awc.war** file is rebuilt and deployed.
